American Radiosurgery Exhibits at the 80th Meeting of the American Academy of Neurological Surgeons

San Diego, CA, April 19, 2012 - American Radiosurgery, Inc. announced today that the company has successfully exhibited at the 80th Annual meeting of the Academy of Neurological Surgeons, held April 14-18, 2012 in Miami Beach, FL. Attending the meeting gave American Radiosurgery exposure of its radiosurgery products to over 2,700 participating neurosurgeons.

Mr. Ravi Joglekar, President of American Radiosurgery, Inc. stated, “The AANS attracts many international neurosurgeons as well as many distribution groups who have shown a great deal in representing the RGS Vertex360™ and the RGS Orbiter™ in their respective countries. We created numerous leads from the exhibition and had an opportunity to better educate international neurosurgeons on the advantages of our technology and our pricing.”

Mr. Joglekar further added, “As the number of patients treated world-wide with our RGS Vertex360™ increases, physicians become more convinced of the effectiveness of our technology platform.”

American Radiosurgery, Inc., is a neurosurgical/radiosurgical device company providing advanced technology for the non-invasive treatment of brain tumors and other brain disease entities. The company is privately held and is based in San Diego, CA.
